CHOICE COLLECTION OF "FANCY" HYACINTHS

In this collection we place all the high-priced varieties. There is such a demand for them in Europe, where they are well acquainted with the good sorts, that the demand exceeds the supply, and they are always scarce and hard to get. When you have the following twelve Hyacinths in your possession, you have the very best that money can buy. They are every one gems of the first water.

PRICE, 20 CENTS EACH, OR THE SET OF TWELVE FOR \$1.50. ANY SIX FOR 85 CENTS.

In ordering, say "Fancy" Collection of Hyacinths. They are the largest, the most delicate colored and the most fragrant of all Hyacinths.

BIRD OF PARADISE—The spike is the largest of all yellow Hyacinths. The color is a rich deep golden-yellow. Very pure. No other yellow Hyacinth approaches it in either color or size.

CZAR PETER—This is, without question, the finest of all light blue Hyacinths. The truss is very large and solid. The

Fancy Hyacinths.

color is a delicate sky-blue. This Hyacinth is admired more than any other variety of any color in Holland. Simply grand.

ENCHANTRESS—Do not forget that the porcelain-blue color in Hyacinths is the most admired and in greatest demand. This is a delicate porcelain-blue color. Extra fine

GRAND MAITRE, "Grand Master"—Deep porcelain-blue; one of the grandest of all blue Hyacinths. Much prized in Holland.

KING OF THE BELGIANS, "Roi des Belges"—So many persons complain that they never get a bright red Hyacinth. The color of this grand variety is a rich, glossy ruby-red of the brightest hue. Certainly a gem.

KING OF THE BLUES—This is the richest and most elegant of the dark blue Hyacinths; it is so dark that the texture of the flower seems covered with a rich sheen of velvet almost black. Exquisite.

LA GRANDESSE—This variety deserves the name of Grandness. Splendid, immense spikes of large pure ivory bells, waxy in appearance, vying with the snow in purity, while its fragrance is delicious, yet penetrating. Simply exquisite. The best of all whites. Extra fine. Immaculate in color.

LA VICTOIRE—This is a bright red Hyacinth of the greatest merit. The color is a rich even shade of bright red. Superb.

LADY DERBY—This is said by all who have seen it to be the best dark rose colored Hyacinth yet offered. The florets are extra large. Spike solid and compact and of immense size, and the fragrance is delicious. The color is a rich deep rose, very bright and distinct. Elegant.

QUEEN OF THE BLUES—In Holland the delicate blue Hyacinths take precedence over all other colors, and the blue varieties in this collection cost much more than any other color. With Czar Peter this variety is a sure enough rival. It does not conflict with any of the other blues in this collection, being entirely distinct, a delicate porcelain-blue, a color that is extremely rare in flowers of any kind. Extra fine.

SIR WILLIAM MANSFIELD—This is the rare color in Hyacinths, being a most beautiful shade of lilac or violet. When you see this in flower you will always remember it.

REMEMBER that the foregoing Twelve Hyacinths are the very best in cultivation. Get them, and you have the best.

FIVE BEAUTIFUL ROMAN HYACINTHS

We wish to call special attention to these beautiful Roman Hyacinths, which are so valuable for early winter blooming. They are among the few flowers which can be had as early as Christmas and New Years. Each bulb throws up several spikes of flowers, which are very beautiful and fragrant, and when kept in a cool room will keep perfectly for weeks. Three can be planted in a four or five-inch pot, and will soon be in flower. In the garden they are the first of all Hyacinths to bloom. We offer extra large bulbs. The new double ones are exceedingly fine. Do not fail to plant a good lot of them for winter.

CANARY YELLOW—Few novelties have come out recently which will in importance surpass this new yellow Roman Hyacinth. There is nothing to be said of it except it is like the common Roman white, except in color, which is a lovely shade of light yellow. 5 cents each; six for 25 cents; thirteen for 50 cents.

PINK—A grand new sort, with enormous bright deep bells in large spikes. 5 cents each; six for 25 cents; thirteen for 50 cents.

RED—A beautiful shade of deep red, very bright and penetrating. 5 cents each; six for 25 cents; thirteen for 50 cents.

WHITE—Has elegant waxy-white bells of great beauty and fragrance. Large bulbs, 5 cents each; six for 25 cents; thirteen for 50 cents.

SPECIAL OFFER

Roman Hyacinths for forcing in pots. If planted early and kept warm can be had in bloom for Christmas.

OUR "GRAND" COLLECTION OF SINGLE HYACINTHS

We advise all our friends to plant Single Hyacinths, as the spikes are very much larger, and the individual florets much larger and more compact, while the fragrance is much sweeter than in double varieties. In a word, they are much stouter and grander in every respect. Price, 10 cents each; the set of twelve for \$1.00. Two sets for \$1.75. Any six for 50 cents. A fine collection of Hyacinths at moderate cost. In ordering, say "Grand" Collection of Hyacinths.

CARDINAL WISEMAN—If there is one Hyacinth that will instantly attract attention it is this one. A beautiful silvery-rose color.

GRAND LILAS—Immense spikes and mammoth florets. Probably the largest of all Hyacinths, and is another of those delicate blues, the color that fairly entrances you. A variety that is deservedly popular everywhere. Superb.

GARABALDI—So many people are looking for a red Hyacinth. Garibaldi is a rich dark ruby-red. Very showy and attractive.

GENERAL DE WET—This is known in Holland as the "Pink Grand Master." It certainly is a most wondrous beautiful bright shade of silvery-pink.

INNOCENCE—A lovely shade of creamy-white. This is one of the new varieties, and takes rank in Holland among the ten best varieties. It sometimes comes with very delicate tracings of pink that set off its charms to great advantage. Superb.

KOH-I-NOOR—This charming variety is so brilliant as to be named for the great diamond of that name. A very showy red Hyacinth.

LORD BALFOUR—A grand large spike bearing immense bells of a deep violet color.

MORENO—This is said by all who have seen it to be the very best rich crimson Hyacinth yet offered. The florets are extra large, spike solid and compact and of immense size and the fragrance is delicious. The color is a dazzling, sparkling red, very bright and distinct; elegant.

MR. PLIMSALL—This is a very attractive Hyacinth bearing immense spikes of pure white with a delicate blush overcast.

PINK BEAUTY, Charles Dickens—Large, tall spike, very shapely bells of the largest size. This well deserves the name of Pink Beauty, as it is the finest of all pink Hyacinths. Extra.

PERLE BRILLIANT—Another of those marvelous colors in Hyacinths, in fact the one rare color in all flowers, a light porcelain-blue. Extra fine.

YELLOW HAMMER—Deep golden-yellow. A very refined and chaste color.

Pan of "Grand" Single Hyacinths, showing how they may be flowered in the house.

"POPULAR" COLLECTION OF HYACINTHS

Price, 10 cents each; the twelve for 90 cents; any six for 50 cents.

ALBERTINA "Augusta"—Pure white, extra fine.

CHARLES DICKENS—A grand shade of bright blue.

GIGANTEA—Immense truss of bright rose colored flowers.

GERTRUDE—This is the freest flowering of all the Hyacinths; often has two to four spikes of bloom, a lovely deep pink color.

GENERAL PELLISSIER—Deep scarlet, early, good forcer. The richest red of all the Hyacinths.

GENERAL GORDON—A grand deep golden-yellow Hyacinth.

GRANDEUR A MERVEILLE—Has many admirers; of a delicate blush-white. Superb.

JOHAN—Large truss of delicate porcelain-blue.

KING OF THE YELLOWS—A very pure color of bright yellow.

LORD McCAULEY—Very rich red in color; has beautiful large, compact spike. A very handsome and showy variety.

MARY—Immense spikes of rich dark blue.

MADAME VAN DER HOOP—Pure white; immaculate in color.

THE GRAPE HYACINTH—Improved

Grape Hyacinths.

This charming little gem should be found in every garden in abundance. It has been termed the "Blue Lily of the Valley," and when planted in a mass with that sweet flower it does resemble it to some extent, and forms a most fascinating combination. It grows about the same height, and blooms about the same time each spring. It increases rapidly, and when once planted a mass of beautiful blossoms, which will increase each year, is insured for a lifetime. But for winter blooming in pots it is of the greatest value. Plant five or six bulbs in a five-inch pot, and you will have as lovely a pot of bloom as you can imagine. Words fail to do it justice. Flower stems grow a foot in height, bearing a dense spike of sky blue bells tipped with white, and oh! so lovely. Please remember that ours is an improved strain of Grape Hyacinths, much superior to the old form.

IMPROVED BLUE—Three for 5 cents; twelve for 15 cents.
SNOW WHITE—New and scarce. 2c each; 6 for 10c; 12 for 18c.

THE FEATHERED HYACINTHS

A very pretty and curious species of Hyacinths, the flowers of which are a feathered plume, borne on the end of a large spike. It is perfectly hardy, and is particularly adapted for open ground planting and for indoor culture. Price, 3 cents each; ten for 25c.

MIXED HYACINTHS

FOR BEDDING OUT IN THE FALL

These mixed Hyacinths are used almost exclusively for bedding out in the fall on account of their cheapness. They are just as good colors and just as fragrant as the named varieties; the difference is in the cost of keeping the named sorts separate, both while planting and after they are dug. The exact shades cannot be given, but the general outline of colors are kept separate, so that in ordering you know what color you are buying.

Early Double Flowering Tulips

and in consequence when singles and doubles are planted in conjunction the "time of the Tulips" is greatly prolonged. Double Tulips are beautifully adapted for beds on the lawn, in the garden, and for mingling in clumps of half a dozen or more around the edge of shrubbery. They are robust growers and exceedingly effective. The early sorts do splendidly when grown in pots for winter blooming, but must be forced much slower than Single Early Tulips, by keeping them cooler. Price, 3 cents each, or the set of twenty-four distinct kinds of Double Early Tulips for 60 cents. Those preceded with a star are the best varieties for forcing indoors.

ALBA MAXIMA—Creamy-white; very desirable.
COCHENELLE—A beautiful carmine color.
COUNT OF LEICESTER—Yellow, flamed with red. Fine bedder.
Flowers at the same time as La Candeur and Rex Rubrorum.

PURPLE CROWN—The only real dark red double Tulip. Very rich and effective.

QUEEN VICTORIA—Rich wine color. Very distinct.

ROSE BLANCHE—Pure white. Splendid bedder.

***ROSINE**—A beautiful, rich clear pink. Fine forcer.

REX RUBRORUM—Richest scarlet. Beautiful when planted among La Candeur to form designs of any description, as they grow of equal height and bloom at the same time. A rich effect is produced by planting Rex Rubrorum in center of bed, then surround this with La Candeur, and border with Count of Leicester. They all bloom at one time.

***RUBRA MAXIMA**—Dark velvety-scarlet, immense large flowers.

***ROSE LA MONTAGNE**—(Rose of the Mountain.) Beautiful light pink, good flower, tall grower.

TEA ROSE—Salmon-yellow; color of Marechal Niel Rose.

EARLY FLOWERING SINGLE TULIPS

NAMED VARIETIES. Those marked with a Star are the best for forcing in the house.

TULIPS are such universal favorites that it is scarcely necessary to expatiate upon their merits here. Their ease of culture, combined with beauty of form and gorgeous coloring, render them the most popular bulbs grown for spring bedding, and for winter flowering in the greenhouse and window garden they are incomparable. The Tulip is extremely hardy and of easy culture, flowering as freely in the shade as in the sunshine, and producing as fine flowers in a confined town garden as in a more favored place. Double and Single Tulips, when associated together and planted in front of shrubs, maintain a longer display than if either are separately planted. In gardens where the flower beds must be kept gay from the earliest day of spring, plant between the lines of Tulips, Scilla Sibirica, Chionodoxa Lucillae, Snowdrops or Crocus, and as these flower first they can be removed or cut down when the Tulip is coming into bloom. The Single Tulip has a greater variety of rich, delicate and attractive colors than any other selection of spring flowering bulbs. The Single Tulip is extensively grown for indoor decoration, three or five bulbs in a pot.

Price, 3 cents each, any fifteen for 40 cents; the set of forty-two distinct varieties of Early Single Tulips for \$1.10.

ADMIRAL REINIER—Rosy-red, white striped; a grand Tulip.
ARMS OF LEIDEN, "Wapen Van Leiden"—White, striped with violet and red; very beautiful.
ARTUS—Bright scarlet, splendid bedder; flowers with La Reine and Golden Eagle.
***BELLE ALLIANCE**—(Waterloo.) A clear scarlet; flowers at same time of L'Immaculee and Chrysalora.
CHRYSLORA—Golden-yellow; extra fine. It is the best single yellow Tulip for outdoors.
COTTAGE MAID—(La Precieuse.) Snow-white, bordered with pink; very pretty.
***COLEUR DE CARDINAL**—Brightest red, outside of petals shaded bronze.
CRIMSON KING—(Roi Cramoisi.) A good crimson bedder.

DAFFODILS AND NARCISSUS

"Daffodils—That come before the swallows dare, and take the winds of March with beauty."—Shakespeare.

THE wonderful creations in the way of new varieties have awakened an interest and enthusiasm among the lovers of flowers that has placed this, "The Flower of the Poets," in the front rank of popularity, and they merit all the praise that can be bestowed upon them. Appearing, as they do, just after bleak winter, they turn our gardens, lawns and woodlawn walks into gorgeous masses of gold and silver, with a fragrance that is enchanting. They are equally valuable for growing in pots for winter flowering, and some of the varieties are forced in immense quantities by florists for cut flowers in winter. Those preceded by a star are the best for indoor culture. Narcissus are of the easiest culture and all, except the Polyanthus varieties and Chinese Sacred Lily, are perfectly hardy. Our collection has been much enriched, and embraces in addition to the old favorites many new varieties, including the magnificent new hybrids. We are also importing direct from China some of the genuine and wonderful "Chinese Oriental Narcissus," called by the natives "Joss Flower," or "Flower of the Gods."

The Chinese Sacred or Oriental Narcissus

A VARIETY OF
POLYANTHUS NARCISSUS

The "Shui Sin Far," or Water Fairy Flower, Joss Flower, or Flower of the Gods, etc., as it is called by the Celestials, is a variety of Narcissus, bearing in lavish profusion chaste flowers of silvery-white with golden-yellow cups. They are of exquisite beauty and entrancing perfume. It is grown by the Chinese according to their ancient custom, to herald the advent of their new year and as a symbol of good luck. The bulbs are grown by a method known only to themselves, whereby they attain great size and vitality, insuring luxurious growth and immense spikes of flowers. In fact, the incredibly short time required to bring the bulbs into bloom (four to six weeks after planting) is one of the wonders of nature. "You can almost see them grow," succeeding almost everywhere with everybody. They do well in pots of earth, but are more novel and beautiful grown in shallow bowls of water, with enough fancy pebbles to prevent them from toppling over when in bloom. A dozen bulbs started at intervals will give a succession of flowers throughout the winter. We are importing direct from China immense bulbs of the true large-flowering variety. 15 cents each, four for 50 cents.

Chinese Sacred Narcissus.

**REMEMBER, You must buy
Hyacinths, Tulips, etc., NOW.
You can not buy and plant
them in the springtime.**

GIANT GOLDEN SACRED LILY

(Jonquil Campenelle Regulosus)

The flowers of this beautiful Sacred Lily are almost identical with the Chinese variety, except that they are of the most lovely shade of deep golden-yellow, making a fine contrast with the white bloom of that noted kind. The bulbs are not nearly so large, but the trusses of flowers are of good size, making this a charming bulb for house culture. Grows in water, like the old variety. 3 cents each, six for 15 cents, 25 cents per dozen.

TRY A DOZEN, AND BE DELIGHTED

FOR FALL PLANTING

"The fairest of all things that blossom and grow,
Sweet as the summer and pure as the snow,
Is the Lily that tells,
Like the glad Easter bells,
Once more the sweet story which all hearts should know."

LILIUM HARRISII

The True Bermuda Easter Lily

This peerless Lily is the greatest acquisition to floriculture made in many years. Their profusion of bloom, the remarkably short time required to bring them into flower, and the certainty to produce abundant bloom, and also the ease with which they can be manipulated to be flowered at any desired period, such as Christmas, Easter and other special occasions, make them invaluable. Flowers are delightfully fragrant, pure waxy white, of great substance, and if cut as soon as they are open or partially open they can be kept for two weeks. A short time only is required to bring them into bloom. Bulbs potted in August can be had in flower in November if desired. A succession of bloom can be kept up from November to May by bringing the pots of rooted bulbs in from cold frames at intervals during the winter. The quantity of bloom produced is marvelous. Blooming plants in pots form typical Easter offerings and presents, for decoration of window, table, house or church. As a garden Lily it is of great beauty, being entirely hardy except in Northern climates, where it requires a protection of leaves or litter to the depth of five or six inches. 20 cents each, three for 50c.

LILIUM CANDIDUM

The old-fashioned pure white garden Lily, also known as Easter Lily, or Annunciation Lily. One of the hardest. Flowers snow-white, with heavy yellow stamens and sweetest fragrance. It bears from five to twenty blossoms. This is the most decided variety we have in expressing its preference for a planting time. It must be planted in the early autumn to succeed well, as it makes its leaf growth at once after planting, and prepares itself for early flowering. The bulbs are sometimes kept in cold storage for spring sales, but never do quite so well. Customers will do well to plant a bed of twenty-five or more for a permanent bed or border. 20 cents each, three bulbs for 50 cents, \$1.50 per dozen.

Easter Lily.

LILIUM AURATUM

The Gold-Banded Lily of Japan

This is the highest type of flowering bulbous plants. The most beautiful and fragrant of all our list. The flowers are of immense size, being fully twice as large as those of almost any other Lily. The new bulbs are brought from Japan for us each year, and only such will give best results. They are shipped to us wrapped in a ball of clay, and arrive plump and sound, every one ready to bloom. Fine bulbs, 20 cents each, three for 50 cents, \$1.75 per dozen, postpaid.

LONGIFOLIUM GIGANTEUM

The freest-flowering of all Lilies. Pure white; very showy. 20 cents each, three for 50 cents.

The single Tiger Lily, imported. This is a great favorite. There is no better Lily grown. 20 cents each, three for 50 cents.

SPECIOSUM RUBRUM

LANCIFOLIUM ALBUM

One of the most beautiful of all Lilies. Pure white and very fragrant. 25 cents each, three for 60 cents.

LILY OF THE VALLEY

The modest bell-shaped flowers, of the purest white, are highly prized for cutting purposes, and for flowering in pots in winter they are exceedingly well adapted. Beautiful and most interesting ornamental designs for the parlor or conservatory may be produced by planting Lily crowns in Crocus pots or in pyramidal pots made especially for this purpose and pierced with holes. They will last several weeks in beauty. By taking them in at intervals a succession of different designs may be kept up all winter. They are also forced in immense quantities by florists, but they are the most charming when grown in large patches in partially shaded localities around the lawn, near the borders of streams, lakes, etc., being perfectly hardy. 3 cents each, 30 cents per dozen.

ERANTHIS HYEMALIS—"WINTER ACONITE"

This bears fine large flowers of deep golden-yellow, one of the earliest spring flowers to bloom. Very desirable. 3 cents each, 25 cents per dozen.

Lily of the Valley

TRITELEIA UNIFLORA

This is one of the choicest additions to winter-flowering bulbs that has been offered in many years. The bulbs are small, and several can be planted in a pot, each one of which will send up several flower scapes, bearing star-shaped blossoms one inch in diameter, pure white, elegantly lined with celestial blue. As the flowers follow each other successively and last a long time before fading, a pot of these bulbs is never without flowers for several months in midwinter. They are also quite hardy, and can be planted in the open ground, where they will bloom elegantly in the early spring. We earnestly advise all lovers of flowers to plant this beautiful gem. It is sure to thrive. Fine bulbs, 10 cents per dozen.

Tritelia Uniflora.

TRITELEIA LAXA

This is a new variety, bearing ten flowers to the stalk instead of one flower like the Uniflora. Elegant. Be sure and try it. 20c per dozen.

Scilla Sibirica, or Squill

Star Hyacinths—*Scilla Sibirica* is one of the loveliest spring flowers. It has color almost as deep as the sky itself. Quite hardy, and flowers out of doors at the same time as the Snowdrop, in front of which it gives a charming effect. Planted in pots and kept indoors it may be had in bloom as early as Christmas. Its magnificent bright blue color makes it suitable for any decorations whatever. Two for 5 cents, 25 cents per dozen.

Scilla Sibirica.

IXIAS

The *Ixias* produce their beautiful flowers in spikes, and are of the most dazzling and brilliant colors, and sure to attract great attention. It is only a few years that they have been grown in this country to any great extent, but in that time, like the *Freesia*, they have become very popular. For pot culture in the house they give great satisfaction, being of easy culture and free bloomers. Half a dozen bulbs can be planted in a five-inch pot, and the display is magnificent. For open ground culture give them winter protection with leaves or straw. They are very cheap, and all lovers of odd and beautiful flowers should certainly add them to their collection. The sorts we offer are new and very fine. 10 cents per dozen.

Ixias.

WINTER BLOOMING FREESIAS

Freesia Refracta Alba—

No description can do adequate justice to this beautiful plant. The flowers are two inches long and about the same in width, shaped like miniature *Gladioli*, and borne in clusters of six to ten on depressed horizontal scapes. The body of the flower is pure white with lower segments spotted lemon yellow. The perfume is most delicious, being a mixture of *Mignonette*, *Violet* and *Jasmine*, and one plant is sufficient to perfume a large room without the overbearing perfume of *Hyacinths* or *Tuberoses*. The plant has tooth-shaped bulbs and flat, spreading leaves. Its cultivation is the simplest, requiring only to be potted in October, to be watered sparingly at first, placed in a sunny window, and watered more as growth progresses. When out of flower, store in some place, and repot at proper season in fresh soil for another year's growth. Six fine selected bulbs for 15 cents, twelve for 25 cents.

ORNITHOGALUM ARABICUM

We introduce this as a new winter-blooming bulb of great beauty and value. In magnificence there is nothing like it among winter-blooming bulbs or plants. Even the grand *Hyacinth* must be preceded by the stately beauty of this flower. It is a native of Arabia. Bulb large and solid, closely resembling that of a *Hyacinth*, and requiring exactly the same culture. Leaves long and narrow, flower spikes 18 to 24 inches high, strong and graceful, bearing an immense cluster of large pearly-white flowers, having a jet black center. The individual flowers keep perfect many weeks before fading, so that for more than a month this grand spike of bloom is in full glory. Its durability is almost without an equal among flowers. Add to this its delicate aromatic fragrance, and we have a winter-bloomer which all must admit stands without a rival. Its culture is the easiest, as it will grow in any position in any window. A bulb can be planted in any four-inch pot, or several in a large pot or box. Pot in September, October or November. They can even be kept and planted as late as February 1st. For open ground culture they do well if protected from freezing severely. Large flowering bulbs, 5 cents each, or six for 25 cents.

Freesia Refracta Alba.

CROCUS VERNUS THAT BLOOM IN THE SPRING

For garden culture plant bulbs two inches deep and two or three inches apart. They are so cheap and pretty they ought to be found in every garden in abundance. They bloom splendidly when planted on the lawn among the grass. They lift their bright heads up through the sod very early, and give the lawn a charming aspect. These two varieties of Gladiolus are the prettiest of all flowers to grow for winter, also perfectly hardy, and can be planted outdoors in the fall for summer blooming. 3 cents each, 30 cents per dozen.

RANUNCULUS

This class of bulbous plants is among the finest of all flowers. The French Ranunculus, especially, are distinguished by great strength, size and beauty. They attain a height of ten to fifteen inches, and the hues and colors of their many varieties, varying from pure white and yellow to bright vermilion and crimson, are really beautiful. The Persian Ranunculus are a little smaller than the French, and also more dwarf. However, their colors are as fine, and exhibit the most beautiful shades, and are of the most graceful form. The Turban, or Turkish, Ranunculus differ very much from each other, and display lovely Oriental beauty of coloring. Can be grown easily in pots, or out of doors if protected.

DOUBLE PERSIAN RANUNCULUS—10 cents per dozen.

DOUBLE TURKISH RANUNCULUS—Five for 10 cents, 20 cents per dozen.

Indoors they are equally pretty and easily brought into bloom. Being dwarf, they are usually planted along walks or the margins of beds. The Giant Snowdrops we offer are much superior to the common varieties, producing large flowers.

GIANT SINGLE SNOWDROP—(Elwesi.) Two for 5 cents, 15 cents per dozen, \$1.00 per 100.

GIANT DOUBLE SNOWDROP—Three for 10 cents, 30 cents per dozen, \$2.00 per hundred.

SPARAXIS

Pure white, yellow, orange, red, purple and violet are to be found, either separate or blended, in pleasing variegation. Three or four bulbs may be put in a four-inch pot with good effect. Try them; they are charming. 10 cents per doz.

ANEMONES

Very beautiful and brilliant spring-flowering bulbs which should be found in all gardens. They possess a beautiful range of very fine colors, such as brilliant scarlet, red, blue, rose, striped, carnation, etc. For pot culture they are very fine indeed, and succeed best if left in the same pot year after year without removing or disturbing.

SINGLE ANEMONES—All colors, mixed. 10 cents per dozen.

DOUBLE ANEMONES—All colors, mixed. Four for 10 cents, 20 cents per dozen.

AMARYLLIS JOHNSONII

Lovely bulbous plants for winter or early spring blooming. Give plenty of water while growing. When through blooming, gradually withhold water, so that they may become dormant during the summer. Start again in the fall by repotting in fresh soil and increasing the supply of water gradually. This is the large crimson variety that is very popular. Immense Lily-like flowers of deep crimson, borne on strong stalks of from five to eight flowers. Very desirable. Fine bulbs, 40 cents each.

Giant Snowdrops.

BERMUDA BUTTERCUP OXALIS

An Unrivalled Winter-Flowering Pot Plant.

This is one of the finest winter-flowering plants for pot culture that we have ever seen. It is such a strong, luxuriant grower that one bulb will be sufficient for a six or eight-inch pot. Place in a dark, cool position for a few weeks to root thoroughly, and remove to a sunny situation in the window or conservatory, in a temperature of about sixty degrees Fahrenheit, and the great profusion of bloom produced in uninterrupted abundance for weeks will astonish and delight you. Flowers of the purest bright buttercup-yellow. Well-grown plants have produced as high as seventy flower stems at one time and over one thousand plants in one season. The flowers, and frequently the leaves, fold up at night, and open again the next morning; but when grown in a partially shaded situation the flowers remain open all the time. Properly treated the plants will flower in six weeks from the time the bulbs are planted. We do not claim the Bermuda Buttercup Oxalis to be strictly a new plant, but a greatly improved selection from *Oxalis Cernua*, grown in the congenial soil and climate of Bermuda until the bulbs have attained great strength, producing bulbs, plants and flowers larger and more luxuriant in all parts than the type. Excels all bulbous plants in profusion of bloom. It is graceful, and delights all who see it. 3 cents each, 30 cents per dozen.

OXALIS

These varieties of Oxalis are all for winter blooming. They make the most beautiful hanging pots and baskets, producing a mass of flowers all winter, which in brilliant and beautiful colors are truly charming. Winter-blooming Oxalis are always sure to please. Plant five or six bulbs in a six-inch pot. They commence growth immediately after planting. My mixture embraces pink, white, yellow, red, etc. Price for mixture of all colors, 10 cents per dozen.

FRITILLARIA MELEAGRIS

Snake's Head or Turk's Cap—Very early flowering bulbs, suitable either for garden or pot culture. In pots they bloom during January or February, and are very attractive. They resemble Lily flowers, and are borne on graceful, drooping stems. An attractive object to anyone's garden or window. Assorted colors, 5 cents each; six for 25 cents.

MILK AND WINE LILY

Crinum Fimbriatum.

"I must tell you that Milk and Wine Lily has done famous work. It has developed nine fine blooms, and there are two unopened buds. We therefore gave it a free ride last Wednesday to our chapel services. It was admired by everybody. There were Bostonians and people from various towns to admire and enjoy it."—Mrs. E. Adams, Mass. A grand sort. The most beautiful of the *Crinums*. Its bulbs grow large, and its strong growing foliage is erect and sword-shaped; flowers in umbels, very large and showy, three to four inches in diameter, striped, with white and carmine, and very fragrant. Hardy in the South. Fine bulbs, 25 cents each.

ALLIUM NEAPOLITANUM

This plant has graceful leaves from eight inches to a foot long, of the darkest green, forming a very cheerful mass. Each plant bears from one to three scapes, or trusses, of flowers, which are pure white, about one-fourth of an inch in diameter. Many of the trusses bear over one hundred flowers each. Five for 10 cents, 20 cents per dozen.

CHIONODOXA LUCILIAE

(Glory of the Snow.) One of the most lovely flowering spring bulbous plants ever introduced, producing spikes of lovely azure-blue flowers with pure white centers. It is one of the earliest of all flowers, blooming before the *Crocus*, and sure to be more than satisfactory to those who plant it. For winter-blooming this bulb is also lovely. Strong home-grown bulbs, 3c each, four for 10c, 25c per doz.

The new Godfrey Calla *Devoniensis* is a wonder. Blooming bulbs, 25 cents each.

It is but a few years ago that this sold at a very high price. We are now able to offer strong, blooming bulbs, at 35 cents.

HARDY HERBACEOUS PEONIES

G. & R. Peony Field in Full Bloom.

"I felt as if the heavens had opened and showed me a glimpse of the glories within."

That is just what a lady exclaimed when telling about our magnificent Peony farm with over a quarter million plants and more than a million blooms. "When I first saw the Peony field this spring there were by low computation fully one million blooms in sight; they were a revelation. The Field of the Cloth of Gold was a tawdry hand-made affair compared to it. It was as if a softly tinted cloud had settled over the field through which the fiery sun slanted its scarlet rays, while the delicious rose-like fragrance met you from afar. Photography can never give the color and perfume of these gorgeous blossoms. How large some of them were I dare not say, but a dozen of them made as heavy an awful as most women cared to carry. A convention was in progress in

Springfield (many women in attendance) when the Peony blooms were at their best and several hundred were sent to decorate the stage. It nearly broke up the convention, for when the delegates were convinced that the blooms were really Peonies, and that they might be seen by the thousands at the field, every vehicle to be had was soon on the way to the Peonies." Peonies are entirely hardy, take care of themselves, never fail to bloom. Insects or disease is unknown among them. You no doubt know the old varieties of Peonies, but these new varieties we offer will be a revelation to you. Be sure and plant liberally, don't be stingy, they will repay you.

TIME TO BUY PEONIES DURING THE FALL SEASON

The proper time to buy and plant Peonies is from September 1st until the ground freezes up. The plants we offer are field-grown divisions with two to five or more eyes, commonly known as one-year plants. We can supply two-year-old roots of all varieties named at double the price here quoted. Three-year-old roots at treble the price here quoted. We always give value.

ALBERT CROUSSE—Immense, very full convex blooms; delicate sea-shell pink, a solid color; a remarkable and striking variety. 75 cents each.

ANDRE LAURIES—Rosy-red; very free late bloomer; an old and well-known variety, considered very useful; probably the most widely planted of any Peony. 25 cents each.

ASA GRAY—Large, full imbricated Rose-formed bloom; grand petals salmon-flesh; center very full and perfectly formed; flesh-pink, delicately dotted and flaked with carmine and lilac; strikingly imposing and valuable; a most unusual sort. From the formation of the flower it is designated as a double-decker. 50c each.

AGNES MARY KELWAY—Guard petals light rose, with yellow petaloids bearing a lovely rose tuft; a tri-colored bloom that has many admirers. 35c each.

BERLIOZ—Enormous, full globular imbricated bloom; bright currant-red; petals tipped silver. 35c each.

CHARLEMAGNE—A Peony that has many admirers; blooms late. Color a delicate tint of lilac or heliotrope. Grand. 35 cents each.

CANARI—Primary petals, white flushed pink with deep primrose-yellow center. Sweetly fragrant and early. 35 cents each.

CROWN OF GOLD—(Couronne d'Or.) Immense, very full, ball-shaped bloom; pure snow-white, with golden-yellow reflex; carmine edges on some center petals. This variety will cause you to stand up and take notice. 60 cents each.

DR. BOISDUVAL—This Peony is conspicuous among the reds by its brilliant velvety dark maroon color. The coloring is simply dazzling. Flowers very full and double; extra fine. 60c each.

DORCHESTER—Late, free bloomer; color delicate salmon-flesh. We think this is one of the prettiest Peonies grown. Grand for all purposes. 35 cents each.

DUCHESS DE NEMOURS—Superb cup-shaped; sulphur-white flowers, fading to pure white. In all Peonies there is nothing so exquisitely chaste and beautiful as this variety in the half open bud state; excels as a cut flower. Don't omit it. Late. 25 cents each.

DUKE OF WELLINGTON—One of the grandest flowers in our whole collection. Very large, high built flowers of immaculate white. Simply grand. 50 cents each.

EDULIS SUPERBA—Beautiful brilliant pink, with silver reflex; large, well-formed, full flower on strong stem; blooms early with Festiva Maxima. 25 cents each.

EUGENE VERDIER—This is one of the most exquisitely chaste and refined Peonies of the whole family. It combines every desirable feature. Immense size; globular shaped, and literally packed with petals; color blush, delicately shaded to pink toward the center; profuse bloomer, deliciously fragrant; very slow in opening, holding a long time either on or off the plant. As a cut flower and for decorative purposes this Peony is unexcelled by any Chrysanthemum ever grown. 60 cents each.

EXCELSIOR—Brilliant crimson, shading to lighter at the tips of the petals; very large and full, and finely fringed; an American production to be proud of. 35 cents each.

FELIX CROUSSE—All Peony enthusiasts are familiar with the fact that it is difficult to get a red Peony that is a self color—that is, a full, rich, even shade of red without being suffused with a shade of another color. Felix Crousse fills the bill. A rich, even, brilliant ruby-red, exceptionally fiery, bright and effective; very large, full bell-shaped bloom. I place this in the front rank of all red Peonies—nothing like it in color. 50 cents each.

FRAGRANS—Soft delicate pink, interspersed with salmon; an exceedingly good, perfect bloom and a pretty flower; highly fragrant. 25 cents each.

FESTIVA MAXIMA—This is not only the finest white in existence, but in most quarters it is regarded as the queen of all the Peonies. Mr. Harrison says: "This flower has reached the ultimate beyond which we cannot go." It combines enormous size with wondrous beauty, often seven to eight inches in diameter; color snow-white, flecked with an occasional clear purple spot on edge of center petals; in addition, it is very fragrant; a glorious flower, impossible to describe; magnificent. 35 cents each.

FLORAL TREASURE—Very large and full; clear pink, shading to lighter at center; a splendid hemisphere of fragrance; long, strong stems to uphold the big bloom, sometimes six inches across; very vigorous and floriferous. 50 cents each.

GIGANTEA—This is one of the rarest and most sought after in cultivation. Ward calls it the finest of all Peonies for cut-flower purposes. It is one of the earliest to bloom, produces an enormous pink flower, six to seven inches in diameter, on long stems; deliciously fragrant; fully as effective for decorative purposes as the finest Chrysanthemum. Gigantea is a ravishingly beautiful wild flower. 60 cents each.

GOLDEN HARVEST—Very striking variety, producing large tri-colored blooms, the guard petals being blush-pink, with a distinct blush-white color, and deepening to canary-yellow, a few of the center petals tipped and striped with light crimson. This Peony combines cream, gold, white, pink, salmon, peach and apricot, the total color effect of the flower creamy-pink; strong, delicate fragrance; a splendid bloomer; extra fine. 50c each.

HUMEI—Very large, compact and striking cherry-pink flower; among the very best; highly cinnamon-scented; graceful in habit and grown very largely for cut flowers and valuable for landscape work. 25c each.

JENNY LIND—Midseason; large bloom on long stem; strong grower, free bloomer; color bright pink, silvery reflex, with narrow white petals interspersed with center petalage; striking variety. 50 cents each.

LADY DERBY—Immense size, with guard petals delicately tinted rose when they first open; one of the finest and most beautiful Peonies ever grown. 60 cents each.

LADY LEONORA BRAMWELL—Late midseason; compact, vigorous habit; color delicate silvery-pink, shaded with lilac and chamois; three nanken petals tipped with crimson at the center; fine bud. Largely grown for cut flowers. Exceedingly fragrant—in fact, the most fragrant of all Peonies; rare and fine. 35 cents each.

LA TULIPE—Enormous globular, fragrant flowers; delicate rose shading to ivory-white, with center petals tipped carmine. Again we quote Harrison: "There is no Peony so attractive in bud as this—first a ball interlaced with green, red and light—as it grows these interlacings become pronounced. There is no bloom whose unfoldings you watch with greater interest. It finally opens a solid ball of softest blush, with streaks of carmine. There it sits in all its beauty, a glorious flower in a chalice of veined marble, emitting a delightful perfume." This Peony belongs distinctly in a class by itself. 60c each.

LEVIATHAN—This is a monster Peony in size. The flower is remarkable for its conspicuous, high, well-formed center. Color brightest deep, glowing pink; charms everyone. 50c each.

TREE PEONIES

This is a remarkable species, developed from Peony Mouton, a native of China and Japan. In habit of growth it is not unlike a deciduous shrub—the growths are short and stocky, the plant eventually attaining a height of four or more feet and of large circumference; the foliage is quite handsome, and the immense flowers, which usually appear some two weeks ahead of the herbaceous class, are most remarkable for their immense size and gorgeous colorings. Splendid for grouping or for specimen plants on lawns. While a hardy plant, it will be found desirable to give it some protection in very cold latitudes. All shoots springing from the base should be rubbed off; any color you desire. 75 cents each, two for \$1.25.

REMEMBER to Plant Peonies in the Fall and Get Best Results.

HARDY PERENNIAL PHLOX

This is one of the most easily grown hardy perennials, and the large number of beautiful varieties now offered makes it especially desirable. These noble flowers are not only beautiful as individuals, but the cheerful appearance of our gardens during the summer and autumn months is much indebted to them. They succeed in any position or soil, and can be used to advantage either as single specimens in the mixed border or as large clumps or beds on the lawn. To produce the best results, however, they should have a rich, deep and rather moist soil, and let each clump have a space of from two to three feet in which to develop. They will continue to thrive for several years with little attention, as is attested by the fine clumps about old homesteads. The ease with which they are cultivated, their entire hardiness and the extended time of blooming, combined with the varied and beautiful coloring, make them especially valuable for garden planting. The Perennial Phlox usually commence to bloom in early summer, and are brilliant with color until after several frosts have come. They are admirably adapted for cemetery planting, also for a low hedge or screen to hide old fences and unsightly objects. Do not fail to plant Phlox in the fall, any time from September until the ground is frozen. Price, 10 cents each, three for 25 cents, seven for 50 cents, fifteen for \$1.00.

This Rose was raised in Cincinnati, the home of President Taft, and let us say right here while some of you may not admire the President himself, you will one and all admire the Rose given his name. It is without question the most remarkable of all pink Roses. It has a shining, intense deep pink color possessed by no other Rose. It is a fine grower, free bloomer, good size and form, fragrant, and in a class by itself as to color. A rosarian, who is probably familiar with more Roses than any man in America, says: "Talk all you want to about the Rose President Taft, and then you will not say enough." TRY OUR ROSES FOR FALL PLANTING

The habit of planting Roses in the fall time is growing rapidly, and our customers are having marked success. Give fall planting a trial. They get a better start in the spring when planted in the fall, and thus better stand the first dry, hot summer.

FROM time immemorial almost have we been urging upon all our customers to plant Roses in the fall time, and the reason why is just as simple as rolling off a log. Say you put off planting until springtime. You may neglect ordering at the right time, and after you get the Roses the ground may be unfit on account of the weather to plant. Your Rose plants out of the ground are suffering, then after you plant them a dry spell comes on and your Roses have a struggle to get started. While if you plant in the fall the earth is thoroughly settled around the roots by the rains and snows of winter and your Roses are in their place ready to take advantage of every particle of root-making or top-growing weather that comes along, and maybe they won't take advantage of all of it; they start into vigorous root action and wood growth, and you soon have fine plants in full bloom. This should be very plain to you.

THE "EXCELSIOR" LIST OF NEW AND CHOICE EVER-BLOOMING ROSES

For Outdoor Planting or House Culture

Price, 10c each, 3 for 25c; any 7 of your own selection for 50c; any 15 for \$1.00. If you leave the selection of the varieties to us, we will send 9 for 50c, or 20 for \$1.00. Large two-year-old Roses from this list, 25c each, or 5 for \$1.00.

For general planting, more especially in open ground, this class excels all others. One-year-old plants, such as we send by mail, bloom the first and each succeeding year from early spring until severe frosts. Two-year-old plants, of course, yield a greater profusion of flowers, owing to their size. The flowers are noted for their exquisite coloring and delightful fragrance; hardy everywhere in open ground with protection of litter, leaves, evergreen boughs or similar materials. Plant liberally of one-year-old Roses; the harvest of bloom they give the first year compensates for the trifling outlay. Anyone can succeed with them.

FAMOUS ROSE COLLECTION

FOR FALL PLANTING

We Guarantee That No Better Twelve Roses for the Garden Were Ever Offered than This "Famous" Collection. TRY THEM.

Price, 10 cents each; any six for 50 cents; the entire twelve for 90 cents; two-year-old plants, 25 cents each; any six for \$1.25; the entire twelve for \$2.25.

ANTOINE RIVOIRE—This Rose is in a class by itself, no Rose ever produced has such substance of petal; color creamy-white with rainbow tints; a beauty and a wonder.

BESSIE BROWN—A Rose of transcendent beauty; of the largest size; color pearl-white with a delicate tinge of fawn.

ETOILE DE FRANCE—For the best red garden Rose it lies between this one, Rhea Reid and Helen Gould. Some say one and some say the other.

ETOILE DE LYON—Still the best large golden-yellow Rose.

HELEN GOOD (The Beauty Cochet)—What the introducers say: This is a true Cochet Rose and after two years' trial in the garden we pronounce it as good if not better than any Rose for the garden ever sent out. We bought the entire stock of this Rose, paying \$1,000 for two plants, this being by far the highest recorded price ever paid for any Rose. The color is a delicate yellow, suffused with pink, each petal edged deeper, very chaste and beautiful. The color, with its immense size and exquisite form, makes it without question the greatest Tea Rose ever introduced, and we are proud to have brought it out.

HELEN GOULD—A rich red Rose that is a great bloomer; the shade of red has been described best as a watermelon-red; elegant.

KAISERIN AUGUSTA VICTORIA—

A grand white garden Rose that has stood the test of time. Full and double; fine buds and flowers.

LA FRANCE—This is claimed by many to be the queen of all the Roses; bright silvery-pink.

MAMAN COCHET (The Queen of All Garden Roses)—Such beauty and exquisite form as is possessed by this variety is well-nigh marvelous, and cannot be seen in any other Rose we know of. The buds are beautiful, large, full and firm and elegantly pointed; as they expand they show great depth and richness, sometimes measuring two and a half inches from base to tip. Flowers superb when open, extra large, perfectly double and of splendid substance. Small pot plants will in the open ground quickly make large, strong bushes, and produce, on long, stiff stems, great numbers of perfect flowers that are enchanting in fragrance and delicate brightness. The color is rich, clear pink, changing to a silvery-rose. As we see it, one good Rose like any of the

Famous Roses Growing in the Garden.

Cochet Roses is worth a whole collection of poor ones at any price.

SOUVENIR DE PRES. CARNOT—A grand Rose of the largest size; the color a delicate fawn or salmon; extra fine.

WHITE MAMAN COCHET (No Finer Rose Than This)—This Rose attracted our attention from the very first time we ever saw it in flower. It is of the largest size, and, as you will notice, the flower is built up, or rounded, and very double. The color is a pure snow-white. Sometimes outdoors it is tinged pink, which only adds to its great beauty. No Rose surpasses it in vigorous growth and in the immense size of its buds and flowers—indeed, nothing in the Tea family approaches it in size. Deliciously fragrant.

WM. R. SMITH—This Rose has several names, such as Charles Dingee, Jeanette Heller, Maiden's Blush, etc. Color delicate blush. It has no superior as a garden Rose.

Climbing Roses are a joy forever.

BEAUTIFUL HOUSE FERNS

To Cheer Your Home During Winter

There are no plants grown that are more desirable for the house than the following fine decorative Ferns. They are easily grown, free from insects and disease, and thrive well in the ordinary temperature of the living room. See that the plants have plenty of drainage and are kept well watered; never let dry out for any length of time. Every one of these *Nephrolepis* Ferns is entirely distinct in every way.

The Newport Fern,

Nephrolepis Scotti

Identical with the Boston Fern, except it is smaller in all of its parts, and more compact, and will make more fronds in a given length of time. The fronds are lighter green than any of the *Nephrolepis*. The plants are never straggly. Very distinct and fine young plants, 15 cents each; two for 25 cents. Large specimens from 6 inch pots, \$1.00 each.

The New Fish Tail Fern,

Nephrolepis

Davallioides Furcans

This is a grand Fern, entirely distinct from any of the other varieties of *Nephrolepis*. Throughout the South and especially at New Orleans this Fern takes precedence over all others. The ends of the pinnae are so formed as to resemble a fish tail, giving the fronds a crested appearance, very effective. It grows into the most shapely plant of any of the *Nephrolepis*. Grand for house culture. Fine plants, 25 cents each; two for 40 cents.

The New Tarrytown Fern,

Nephrolepis Piersonii

An entirely new form of the Boston Fern. The pinnae subdivide, making miniature fronds which are superimposed on the main fronds, looking as if two or even three were condensed in one, giving the plant a graceful, feathery and plummy effect. 15 cents each, four for 50 cents; strong plants, 40 cents.

The New Philadelphia Lace Fern,

Nephrolepis

Elegantissima

Improved

This without question stands in a class by itself among Ferns. It belongs to the true Ostrich Plume type of Fern, and has this decided advantage over the others of never reverting to the Boston type. Its fronds are long and graceful and airy, resembling delicate lace. A most remarkable variety. Young plants, at 25 cents each; strong plants at 60 cents.

New Plumed Scott Fern,

Nephrolepis Scholzeli

A plumed and crested form of the Scotti Fern. Everyone admires it. Entirely distinct from all the other Ferns. Young plants only 20 cents each.

New Fern "Baby's Breath."

The Grandest Fern of the Age

Nephrolepis

"Roosevelt"

It is our good fortune and great pleasure to offer this wonderful new Fern. In general characteristics it resembles the world famous Boston Fern, but it will sweep that Fern from the boards for two reasons; it produces many more fronds than the Boston, thus making a bushier, handsomer plant. Then the pinnae are beautifully undulated, giving the Roosevelt a pronounced wavy effect seen in no other Fern; as the plant ages this effect becomes quite distinct. In conjunction with three other firms we will disseminate the Roosevelt Fern; it can be bought from no one else this season. Fine young plants, 25c, three for 60c. Strong plants, 60c, two for \$1.00. Extra strong plants, \$1.00; specimen plants, \$1.50.

The New Fluffy Ruffles Fern,

Nephrolepis

Superbissima

This new Fern is quite different from all other Ferns. Its distinguishing characteristics are its dark green foliage, darker than any other Fern, its dense growth, being much more compact, and its irregular shaped fronds which give it the name of "Fluffy Ruffles Fern." The fronds are very heavily imbricated, the pinnae overlapping and are so formed as to resemble miniature Ferns, giving it the appearance of a Fern within a Fern. The plant is very sturdy in its habit and the fronds firm and rigid, never break down, so that it will stand more knocking around than any other Fern. Fine plants, 25c; two for 40c; large plants, 60 each.

The Wonderful New Fern,

Baby's Breath,

Nephrolepis Goodii

This has the finest foliage of all the Ferns. It is so delicate that a lady on seeing it exclaimed, "Call it the Baby's Breath Fern, as it is so dainty in texture that a baby's breath would set its fluffy foliage in motion." It gives the impression of fine lace work, and has been named in the East the Philadelphia Lace Fern. It is a much finer Fern than *Nephrolepis Amerpohlii*. Whatever name you call it by, it is a beauty. Our reputation for it that no Fern in existence can compare with it in fluffiness. Fine plants, 35c, two for 60c; strong plants, 60c; larger plants, 75c.

The Ostrich Plume Fern.

BOSTON OR FOUNTAIN FERN

Nephrolepis Exaltata Bostoniensis

In the vicinity of Boston no other plant is so extensively used as this graceful *Nephrolepis*, which differs from the ordinary Sword Fern in having much longer fronds, which frequently attain a length of six feet. These arch and droop over very gracefully, on account of which it is frequently called the Fountain Fern. This drooping habit makes it an excellent plant to grow as a single specimen on a table or pedestal. This Fern should not be compared to the Ostrich Plume Fern, as they are of an entirely different growth; both have their place and both are beautiful and desirable. Young plants, 15 cents each; strong plants, 35 cents each; extra strong plants, 60c each; grand specimen plants, \$1.00 each.

THE SPRINGFIELD FERN

Nephrolepis Springfield

The most erect growing crested Fern in existence. The fronds are of the Ostrich Plume type, are very stiff and upright growing. Just the thing to plant in vases, boxes or baskets for center piece where other plants are used, as it does not droop like other Ferns. Also fine grown as single specimens. Large plants, 35c each.

THE ORIGINAL SWORD FERN

Nephrolepis Exaltata

A very erect grower, the variety from which all the *Nephrolepis* here offered descended. Very useful for vases, etc., as a center piece. Young plants, 15 cents; extra strong specimens, 75 cents.

DWARF FERNS FOR FERN DISHES

We have selected a few of the hardiest and most satisfactory varieties for filling Fern dishes, than which there is no prettier table decoration. Price, 10c each; or we will send six distinct Dwarf Ferns for 50c. We have six other distinct Dwarf Ferns for 75c; these will make a fine full Fern dish for the table.

ADIANTUM FORMOSUM—The popular Maiden Hair Fern; very beautiful and graceful.

ASPIDIUM TSUSSIMENSE—The most valuable for Fern dishes; of strong, but dwarf and graceful habit, of good color and of the best keeping qualities. A clean, good grower, and very ornamental.

CYRTOMIUM FALCATUM, or HOLLY FERN—A beautiful and rapidly growing Fern that succeeds exceedingly well, small plants making fine specimens in a short time. Fronds resemble branches of holly, from which it takes its name.

PTERIS ADANTOIDES—One of the finest Ferns. Has very decorative and handsome fronds.

PTERIS CRETICA ALBO-LINEATA—A very pretty and useful variegated variety, with silver markings.

PTERIS WIMSETTI—A beautiful low-growing Fern, suitable for table dishes.

THE NEW OSTRICH PLUME FERN

Nephrolepis Whitmanii

A great Fern. In fact, it is a plant that appeals to everyone, and on that account will prove a much more valuable and profitable plant than the Boston Fern, which has had the most phenomenal sale of any decorative plant that has ever been grown, but which cannot be compared to the Ostrich Fern for beauty and general effectiveness. Everyone who has seen it is charmed with it. As someone has expressed it, "There is nothing like the Ostrich Plume Fern in cultivation. In decorative effect it so far outdistances the original variety that there is positively no comparison to be made. We consider it the most valuable novelty that has been introduced in many, many years." It has taken gold medals wherever shown. Fine plants, 25 cents each; strong plants, 40 cents each.

THE LONDON FERN

Nephrolepis Todeaoides

A feathery fronded variety similar to the Ostrich Plume variety, the fronds being more stiff and erect and the pinnae more finely divided. A fine Ostrich Plume sort, and I recommend it in all respects. Young plants, 15 cents each.

The Fish Tail Fern. (For description see page 32.)

Boston or Fountain Fern.

SWEET PEAS

Plant Sweet Peas South of the Ohio River in the Fall—Try Fall Planting and be Surprised—See Our Spring Book for Varieties.

Everyone who has a yard ought to grow quantities of this sweetest of all flowers, that is not only a beautiful low-growing vine for garden and decoration, but one of the most useful of all in furnishing material for vases, bouquets and all cut-flower work. Plant quantities of these lovely flowers and cut them with a lavish hand, for every flower you pick, two will come to fill its place. For the largest and finest blossoms, dig a trench six inches deep, put in two inches of rotten manure, a little earth and sow the seed over this three inches apart in the row, covering an inch and a half. Do this during the month of November or just before freezing weather, and as the plants grow, fill up the trench around them with rich earth. Such planting will produce enormous quantities of flowers of the largest size. Fine Mixture, 5c per packet; 10c per ounce.

EMPEROR PANSIES

Our Emperor Pansies are the best the world produces. They are the choicest large-flowering sorts, both of European and American growers. It has been our aim to make this the finest strain of this favored flower in existence. 5 cents each, six for 20 cents, 35 cents per dozen, forty for \$1.00.

THE EVER-BLOOMING TRITOMA

Hardy Plant—The greatest bedding plant ever introduced, surpassing the finest Cannas for attractiveness and brilliancy, equal to the Gladiolus as a cut flower, and blooms incessantly from June until December, regardless of frost. Plants perfectly hardy in open ground all winter south of Philadelphia. Further north they must be protected or wintered in the cellar like the ordinary Tritoma. Just bury the roots in sand; nothing more is required. Should be planted out very early in the spring and will commence growth and bloom at once, growing larger and finer every day. Plants show six to twenty grand flower stalks all the time, each holding at a height of three to four feet a cluster of flame-colored flowers of indescribable beauty and brilliancy. Each cluster keeps perfect several weeks, and when it fades several more are ready to take its place. Fall frosts do not kill it or stop its blooming, and it is as brilliant as ever long after all other garden flowers have been killed. For cutting it is unsurpassed, and the beautiful long spikes keep several weeks in water. Strong plants that will bloom the first summer, 15 cents each, two for 25 cents.

ARAUCARIA EXCELSA

(Norfolk Island Pine)

Various names have been suggested for this grand plant to properly convey to the mind the appearance of it. Some have called it the "Christmas Tree Palm," from its resemblance to a Christmas tree; others have called it the "Star Palm," because the leaves are arranged to form a perfect star; but no descriptive name can give an adequate idea of its beauty. It has deep green, feathery foliage arranged in whorls, rising one above another at regular distances; its symmetry of form, grace and beauty of foliage are unequaled in the vegetable kingdom. It is easily grown in the house, and is highly ornamental. It requires the same culture as a Palm. Indeed, as a decorative plant for the house this is one of the handsomest and most servicable plants in our collection. Fine plants, 75 cents each; strong plants, \$1.00 each; extra strong plants, \$1.25 each.

At Easter they are seen in every church and in the windows of our finest residences. The ease with which they can be grown, their diversity of color and freedom of flowering will always keep them in public favor. The plants we offer are all set with buds and are beautifully trained specimens, and will flower in springtime in any ordinary living room. In summer set outdoors in the shade and keep moderately wet. Plants twenty-four inches in circumference, 75 cents each; four distinct sorts for \$2.75.

Its flowers are of enormous size, often eight to ten inches across, opening flat, and of such vivid crimson-scarlet color that they can be seen from a long distance like a flaming torch. THE KING OF ALL SHRUBS, THE NEW

Hydrangea Arborescens Alba Grandiflora, "Hills of Snow"

The Most Valuable Hardy Shrub Ever Introduced. Plant in the Fall.

This new Hydrangea commences to bloom in June and continues till August. The plant attains a height of six feet and grows into a symmetrical bush without pruning. When it is through blooming the bloom heads turn green, thus the bush always

has a fine appearance. This is the most handsome of shrubs either in or out of bloom. Grows best in full sunlight, although will thrive in partial shade. It is by far the best of all shrubs. Nothing to compare with it; perfectly hardy everywhere. It is unquestionably a sport from our native Hydrangea Arborescens found in rocky cliffs from New England to Nebraska. This sport attains a height of five feet, and one plant is known that is twenty feet in diameter. It has often withstood thirty degrees below zero without injury to bud or shoot. Several names have been suggested for the new candidate; Semple's Hydrangea has been proposed, but Mrs. Kelly brought it from Pittsburgh years before Mr. Semple discovered it. Prof. Bailey in his encyclopedia calls it "Hills of Snow." This name was given it by Dr. Stone, who discovered a similar form on the bluffs of the Mississippi in Missouri a dozen years ago. Some call it American Ever-Blooming, and say that this is exceedingly appropriate as well as eminently descriptive. There have been counted on one plant 781 good trusses at one time. It is a wonder. Strong plants, 15 cents each; extra strong two-year-old plants to bloom next summer, 25 cents.
